

Protection for the chain and your trousers; the drivetrain is almost completely covered. Our special low friction chain tubes guarantee an efficient power transmission and minimize noise.

The cockpit: comfortable ergo-bars under the seat guarantee relaxed arms and wrists. The direct connection to the front wheel allows for precise steering. Optional above seat steering with foldable TERRACYCLE Glideflex stem.

Comfortable seat options: The *BodyLink* hardshell seat can be adjusted to fit your body like a glove. Alternatively, our *ErgoMesh* seat provides optimum breathability. It comes with an integrated pouch for your small belongings.

Up front, a comfortable suspension fork soothes your ride. The *SPINNER Grind2* suspension fork allows to mount disc brakes. They guarantee incredible braking performance when going downhill.

lowrider rack: the perfect place to put heavy cycling bags

Our *No-Squat* suspension design offers complete comfort with no performance loss. When you push on the pedals all your energy is transferred into motion.

Suitable for trailers (single or double track) of up to 88 lbs weight.

## The *BodyLink* seat: flexible ergonomics

Imagine you get off your bike after a long sporty riding day and the only ache you're feeling is a tingling in your thighs. You can simply relax about an aching bottom, numb private parts, aching intervertebral discs or a stiff neck.

This ergonomic seating comfort is possible with the *BodyLink* Seat from HP Velotechnik. On a conventional bike saddle your entire body weight rests on a very small area. Recumbent bikes offer a considerably larger seating area. However, the seats that have been in use to this day forced the back into a rigid shape or did not give a defined ergonomic position of the lumbar support. The *BodyLink* Seat adjusts to the natural S-shape of the spine: the combination of a rigid anatomically shaped seat base and a slightly curved back rest with a flexible intermediate section offers the rider perfect support over a large area.

The height of the front seat edge and the lumbar support easily adjusts with a quick release lever. The same goes for the back rest: in the city you will prefer an upright position for a good overall view, on a country road you can sit comfortably reclined and take full advantage of your bike's excellent aerodynamics.

## Technical Data

seat height .....	63 cm / 25"
pedal axle height ..	68 – 72 cm / 26.8 – 28.3"
suspension travel ..	5 cm / 2" front 9 cm / 3" 1/2 rear
seat angle .....	39 – 47°
wheel size .....	20" / 26" f / r
tire width max. ....	5 cm / 2"
wheelbase .....	104 cm / 41"
length .....	170 – 195 cm / 6' 5"
height .....	110 cm / 45 1/2"
handle bar width ..	60 cm / 24"
weight (incl. pedals)	from 14.6 kg / 32.2 lbs
frame material ....	aluminum Al7005T6
suspension pivot ..	maintenance free
powder coating ...	pearl orange silver grey custom color
rider height .....	min. 1.64 m / 5' 4" max. 2.00 m / 6' 7"
warranty on frame	10 years

## Your dealer

Excellent advice, test rides and after-sales-service are provided by the HP Velotechnik dealers in North America. For up-to-date information on accessories and our dealer list please review our website at [www.hpvelotechnik.com](http://www.hpvelotechnik.com). Specification subject to be changed without notice. Illustrations show special components. Valid from November 2016.

basic bike		US\$
<input type="checkbox"/>	<b>Streetmachine Gte</b> basic model with under seat steering, suspension fork SPINNER Grind2, AVID V-Brakes, drivetrain SRAM DualDrive 24 speed, SRAM DualDrive grip-shifters, BodyLink or ErgoMesh seat	\$2,990
